

Dhruv Mishra

B.Tech CSE (AI & ML) Student | Web Developer | Python Developer

Ranchi, India | +91 6204282905 | dhruvmh50@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

Software development student with hands-on experience in web development using React, Python, HTML, CSS, and JavaScript. Built and deployed full-stack applications integrating REST APIs and OpenCV-based computer vision features, with practical exposure to machine learning and artificial intelligence techniques.

Education

Aditya College of Engineering & Technology (JNTUK) Aug 2024 – Present
B.Tech, Computer Science and Engineering (Artificial Intelligence & Machine Learning)

Cambridge School, Tatisilwai, Ranchi 2020 – 2023
Secondary & Senior Secondary Education (Class X & XII)

Skills

- **Programming Languages:** C, Python, Java, JavaScript, Kotlin
- **Frontend:** HTML, CSS
- **Backend:** REST APIs
- **Frameworks:** React.js, Vite, Bootstrap, Flask, Node.js, OpenCV
- **Databases:** MySQL, SQLite
- **Tools:** Android Studio, VS Code, Jupyter Notebook, Dev-C++, Apache Server, Cursor
- **Version Control:** Git, GitHub
- **Soft Skills:** Leadership, Problem Solving, Communication, Team Collaboration, Adaptability, Time Management

Internships

Smart Network Analytics Center (SNAC), Usha Martin, Ranchi May 2026 – Jun 2026
Software Development Intern [GitHub](#)

- Engineered dashboard components for real-time network analytics and data visualization, giving the team clearer insight into device performance and connectivity trends.
- Analyzed device and traffic data alongside the technical team to strengthen monitoring workflows and surface usage patterns.

Society Visitor Management System (SVMS), Central Coalfields Limited, Ranchi Jun 2026 – Jul 2026
Software Development Intern [GitHub](#) | [Live Demo](#)

- Delivered frontend and backend components of a visitor management system, streamlining check-in and record-keeping workflows.
- Implemented form handling and dashboard features that improved administrative efficiency and data accuracy.

Projects

EverHeal | [GitHub](#) | [Live Demo](#) Dec 2025 – Present
Frontend Developer & Team Leader

- Designed the frontend of a healthcare consultation platform using HTML, CSS, and JavaScript, improving the UI/UX of patient-doctor interactions.
- Led a development team and represented EverHeal at the EDC College-Level Competition, advancing to Round 2.

Crypto Tracker | [GitHub](#) | [Live Demo](#) Nov 2025 – Dec 2025
Full Stack Developer

- Architected a React web application integrating REST APIs for real-time cryptocurrency prices, trends, and market data.
- Enhanced the interface with React and Bootstrap, improving data readability and overall user experience.

Color Detection | [GitHub](#) Sep 2025 – Oct 2025
Python Developer

- Built a Python application using OpenCV to detect and classify colors through pixel and color-range analysis.
- Applied core computer vision techniques to deliver a functional image-processing workflow.

Face Recognition System (Automated Attendance) | [GitHub](#) Aug 2025 – Sep 2025
Frontend & Backend Contributor

- Integrated frontend features with backend Python scripts to power an OpenCV-based face recognition workflow.
- Automated attendance tracking, advancing the system to Round 2 of Smart India Hackathon (SIH) 2025.

Achievements

- Advanced to Round 2 in the EDC College-Level Competition and Smart India Hackathon (SIH) 2025.
- Solved 50+ problems across LeetCode and CodeChef.
- Built and deployed multiple real-world web and Python projects.
